This is done in Maintenance – Discipline > Consequences (use State Code 3089). • Then go to SIF Mapping > 1054 – Discipline Action and select the new iPass Consequence to map to SIF Value = 3089 Law Enforcement Referral. 	

IP-3966	<p>iPass 2019-2020 DOE SIF State Reporting Change:</p> <p>Added SectionInfo Object Override (Yes/No)</p> <p>iPass has been updated to support DESE’s planned October 2019 change to the SectionInfo Object that allows for SchoolCourseInfoOverride. This is designed to provide districts with the ability to have one course per Attending School with multiple sections each set with different Course Codes (ie. Subject Area, Instructional Level, Credit Type, Credits). This can be used to report off-site college taught courses (Dual Enrollment).</p> <p>*****</p> <p style="text-align: center;">UPDATE – October 2, 2019</p> <p>We received an email from DESE on 10/2/19 informing us that they will <u>NOT</u> be including the new CourseSectionInfoOverride feature in the October 2019 SCS Collection.</p> <p>The fields will stay visible on the Course Catalog Course Section screen in iPass and can be fill in, but the data will <u>NOT</u> be used on the DESE side.</p> <p>*** So for now, ALL sections of a course will use the Course Details values for these fields. ***</p> <p>Sites are warned that if they made changes in how they scheduled because DESE had indicated they were going to use these course section override fields they may have to make some changes to the course sections they set up for the 2019-2020 school year. Contact iPass Support with any questions.</p> <p>*****</p> <p>SectionInfo Object Override (Yes/No)</p> <p>When the “Course Info Override” setting is set to = Yes on the Course Section screen, the values from the Course Section are sent in place of the Course Details values.</p> <p>If set to YES it will send the data in the fields below. If NO it will not.</p> <ul style="list-style-type: none"> • Override Course Code – Enter Text to Course ID you need.
