Welcome to Wednesday's Wisdom – A weekly dose of support!
January 6, 2016

Announcements

Patch Release For Sync Sites – The **7.0.20151228_sync** release went out to all Synced iPASS sites. This release includes enhancements to Online Course Recommendations and the addition of an Attendance Parameter to turn off Multiple Daily Attendance Records. The release also included several corrections and minor enhancement for: SIMS 52 Export, GPA, iAutoAlert, iStaff Career records, College System, Export DOE MEPID Request, and the Allergy Report. Full Release Notes can be found in iPASS Help > iPASS Patch Release Notes.

The **7.0.20160104_sync** patch release went out on January 4th 2016 with an additional program needed for the Attendance parameter to turn off Multiple Daily Attendance Records. This now shows on the "School Attendance Parameters" screen for each school in "Attendance Maintenance."

SIF 2.7 & State Reporting

65% of all sites set up with the Synced Version and SIF 2.7 were able to get their SCS data in and Cross Validated with SIMs and EPIMS using their SIF 2.7 Agents. We want to thank all the SIF sites for working so hard to get their data in, cleaned and submitted. The R&D and Support Teams are working on improvements for the next submission period and will be working with more sites to get them on-boarded with SIF and working with their agent toward 100% submission.

Reminders

January User's Group – The January 13th User's Group Meeting WebEx will be on the topic of "Scheduling." Laura Patton will review setting up and getting ready for 2016-2017 scheduling and will share new and improved scheduling tools including the enhancements to Online Course Recommendations. *Click here for User's Group WebEx details*
