#### **APPLICATION ENHANCEMENTS**

For clients using SIF a new "School Wide Title I" indicator has been added to the School Profile page. This indicator allows school to identify that they are "School Wide Title I" without having to mark each individual student as Title I.

iPass > Administration > School Resources > School Profile

SCHOOL PROFILE					
School Code:	004	School Type:	High School		
State Code:	0456	State Reportable:			
School Name:	Harris High School~	Web Site:

Guidance Secretary:		Guidance Director:			
District:	PA Dev School District V	School Logo:			
Technical School:	Yes •	Logout Page:			
Grades:	03 04 05 06 07	Schoolwide Title 1:	∞		
Submit Done					

Clients using SIF can now reconcile their enrollment report from the Department of Education (DOE), to their student enrollment records within iPass.

iPass> DOE ID Manager > Import/Export > File Upload > upload the DOE file in CSV tab delimited format.

iPass > DOE ID Manager > Import/Export > Enrollment Reconciliation Report > in the field "Enrollment Date File Name" type in the path and file name > Select Submit > Go to iPass Reports > when completed a report titled "Enrollment Reconciliation Report" will be available within iPass Reports > this report will reflect students that are enrolled but are not showing on the DOE report.

IP-2508	The system now allows for an equal number of teacher recommendations for each student.	N/A
IP-2512	SIF Processers screen will no longer reflect an iPass7.0 SIFA agent.	N/A

Notes:

 A new checkbox field labeled "Show All Alternates" has been added to the Student Requests screen. Selecting this checkbox will cause all alternates for all primary recommendations to display on the screen at the same time. <u>NOTE:</u> If the check box is not visible on the Request screen, submit the Recommendation Configuration screen, whether you have made changes or not, and the check box will be added to the screen. Repeat for each school.

Each school can set the default value for the "Show All Alternates" check box on the Recommendation Configuration screen. Set "Display All Alternates on Counselor Request Screen" to YES to display all

alternates by default. Set to NO and alternates will NOT display unless the counselor checks off the box on the Request screen.

2. A new field label "Show Recommendation" has been added to the course record. This will allow you to control which courses are available for parents and students to select from the Course Catalog. In order for a course to appear in the departmental search (non-elective) the "Show Recommendation" must be set to YES. In order for a course to appear in an elective search both the "Show Recommendation" field <u>AND</u> the "Available as Elective" field must be set to Yes.

Use the Course Catalog > Course Details > Field to Update "Show Recommendation" to update the courses. Remember to update each screen and Submit prior to moving to Next screen. This must be done for each school that uses Online Course Recommendations.
