iPass

Release Notes

Version 7.0.20161101_sync
November 1, 2016

Corrections and Minor Enhancements

The following reported issues and minor enhancements are included in this release.

Jira #	Description	Clientele
IP-3204	iStudent and iParent Security Vulnerability. Hexadecimal numbers are no longer used in URLs or in inspect element for photos and View buttons. New "token" numbers are generated and are randomized and associated with the user's login session. They are unique to the session and provide a mechanism for hiding the calling parameter details (including things like database Hexadecimal ROWIDS) from the browser. If these token numbers are changed a blank screen will appear or the screen will refresh back to the user's session.	N/A
IP-2891	iPads and iPhones can now open PDF published documents in iStudent, iParent and iPass.	1504095
IP-3107	Alerts are now showing properly in Gradebook.	
IP-2340	Add/Modify Competency Grades Screen showing (None) under Grade boxes will now show AVG and you can click on AVG to see the average from the Gradebook of assignments that has been linked to the competency/task you are grading.	

IP-2787	In iTeacher > Standard Test Entry > the drop down list in the SELECT A TEST box will now sort in Alpha order.	
IP-3066	Locker combinations now display on iParent View Schedule and Schedule Rotations screens when Show Student locker combo is checked off in iParent Configuration.	
IP-3189	Gradebook Student Bio Button is no longer displaying a blank screen	1547853 1565955 1566829
