April 5, 2017

Enhancements, Corrections and Minor Enhancements

The following items are included in this release.

Jira #	Description	Clientele
IP-3382	CRDC LEA and SCHOOL Files now have all Headers in the correct position and labeled correctly to stop the Header errors when the file was uploaded. All fields that had incorrect calculations or were missing numbers for items/students in counts have been fixed. All CRDC Data Setup v2 mapping screens have been adjusted to show the correct headers, unneeded fields were removed, and missing fields have been added.	1612885, 1609536, 1617539
IP-3368	LEA_ENR field was replaced with LEA_ENR_NONLEAFAC which was field #25 and the fields after #25 were moved into position to accommodate the adjustment.	1606199
