Release Notes

Version 7.0.20170719_sync
July 19, 2017

SCHOOL NUTRITION | STUDENT INFORMATION | FINANCIAL MANAGEMENT

Resolved Issues

Enhancements, Corrections and Minor Enhancements

The following items are included in this release.

Jira #	Description	Clientele
CHANGES		
IP-3384	SIF SSDR: The SIF Mapping Table for 1049 Incident Codes now requires a School be selected at the top of the screen. When the school is selected, only the iPass Incident Codes for that school will be displayed to map to the SIF Value. This was added to accommodate multi-school districts with a high number of iPass Incident codes.	1616502
CORRECTIONS		
IP-3517	The 7.0.20170622_sync patch release introduced an issue with the loading of the Add Discipline Record screen. The screen (disupdate.html) would not fully load. This has been corrected.	
IP-3518	SIF SCS: StudentSectionMarks was sending a 9999 for loss of credits instead of a zero. The 9999 for courses should only be sent for courses worth no credits. This has been corrected.	
IP-3519	The 7.0.20170622_sync patch release added the SIF EPIMS "Teaching Assignment Code" field (DOE Field StaffWATeachingAssignment) to the Edit EPIMS Work Assignment screen. The DOE Field had an Export Order that introduced this SIF field to the Export EPIMS Work Assignment file. This extra field no longer is included in the EPIMS Export file.	1651377
IP-3506 / IP-3527	SIF SSDR: The code 14b4, which is "Other Weapon", requires the type of weapon be reported. The SIF transmission (XML) now sends the Weapon Type code and the Description of Offense Type as an extended element MAOtherWeapon	1645327, 1637092
