Patch Release Notes - 7.0.20170405_sync

The 7.0.20170405_sync patch release included the following corrections related to the CRDC data setup and export:

- CRDC LEA and SCHOOL Files now have all Headers in the correct position and labeled correctly to stop the Header errors when the file was uploaded.
- All fields that had incorrect calculations or were missing numbers for items/students in counts have been fixed.
- All CRDC Data Setup v2 mapping screens have been adjusted to show the correct headers, unneeded fields were removed, and missing fields have been added.
- LEA_ENR field was replaced with LEA_ENR_NONLEAFAC which was field #25 and the fields after #25 were moved into position to accommodate the adjustment.
