

Quick Guide: Setting Up Attendance Calls

The Support Team has put together a Quick Guide to show you how to set up daily batch reports for Attendance Calls files to be sent via sFTP to your call notification system.

The steps in the Guide Guide assume that the public key for the call notification system has been set up for sFTP file transfer and that post-processing options have been set up for school attendance files. If not, please submit a support ticket requesting this be set up for your district's call notification application.
