

MSB Teachers and Rooms Including Exited Query

This query is used for finding Exited/Retired Teachers who are still linked to rooms and course sections due to this data rolling over each year. You cannot assign a course section to a new teacher without clearing out the old teachers first. This query will help you find them.

This report will include all teachers whether working or not with their MSB Teacher and Room selections for the year selected. It will be sorted by Teacher Status showing Retired and Exited first, followed by Working.

Click Execute > Select the year > Click Submit.
