

## Quick Guide: Harris Web Client for Secure MFT File Transfer and Self-Service Photo Upload

The Harris Web Client used for Self-Service Photo Upload has been expanded to offer secure file sharing. The Harris Web Client now offers users the ability to send and receive files securely using MFT file transfer.

Files that contain Personally Identifiable Information (PII), should not be shared through email (unless encrypted) or attached to support tickets. PII is considered to be any information that can be used to distinguish or trace an individual's identity either alone or when combined with other personal or identifying information.

Harris Web Client URL: <https://mft-ipass.iharriscomputer.com/>

**IMPORTANT NOTE:** You will need to login with your Harris Web Client credentials. If you do not have these already for uploading photos, please submit a ticket to iPass Support requesting them. Harris will require that you provide a group email address.
