

Is there a report I can run this school year to show students Next Home Room for the new school year?

Yes. The Next Years Homeroom query. We have recently uploaded this query to iPASS Help for you to download and import into your iPASS site.

To set up the query, select the School, the NEXT School Year (ie. 2015-2016), and enter the Start/End Dates for the CURRENT school year students are enrolled in, and click Execute. The resulting report shows Student ID, Last Name, First Name, Next Year's Homeroom, and Teacher's Name.

Directions on how to import a query can be found in My Queries > Help > [How do I import a query file into my iPass database?](#)
