

How do I keep next year's course schedules from displaying in iParent and/or iStudent?

Several adjustments should be made to the iParent and/or iStudent Configuration screen.

- Set Show Grade Information = Current & Prior (All will show courses when next school year is selected)
- Set Show Schedule Information = Current & Prior

In addition, you can go ahead and highlight the next school year (2016-2017) in Hide Teacher Name and Room Number on student schedule for selected school years. This will insure the Teacher Name and Room Number will not show when you do open up viewing of the next year schedule.
