Patch Release Notes - 7.0.20160218_sync

Sync Version Only.

Application Enhancements for clients using SIF for state reporting:

- School Wide Title I indicator has been added to the School Profile page.

- Enrollment Reconcilation Report has been added to DOE ID Manager > Import/Export.

Minor Enhancements & Corrections:

- A new â€œShow Recommendationâ€ indicator has been added to the Course screen. This indicator shall allow clients to show the course as a recommendation.

- A new Parameter has been added to the Recommendation Configuration screen titled â€œDisplay all Alternates on Counselor Request Screenâ€. When selected Counselorâ€™s will be able to see all Alternate courses.

- Teachers will now be able to view and delete any recommendations they have entered.

- Counselor Recommendation search now allows grade level searches.

- Recommendation will no longer appear on the screen after â€œDeleteâ€, then â€œSubmitâ€ are selected.

- The system now allows for an equal number of teacher recommendations for each student.

- On the Parent and Student Recommendation the ability to see and use the â€œDelete Linkâ€ is now determined by the â€œParent/Student Can Enter Alternatesâ€ parameter.

- Attempted credits are now reflected correctly when running the GPA calculation for Term1.

- The Employee Time Off Summary Report is now available in RTF

- SIF clients > default values have been set in the new DisciplineIncident Object fields.

- End Users can now select a course for homerooms when using Quick Schedule.

- Non Instructional Days can now be added on the â€œView and Modify a Calendar Dayâ€ page.

- Attendance records will no longer duplicate when a teacher and Administrator submit an attendance record at the same time.

- Unscheduled term courses will no longer appear on student schedule screen.

- Un-Publishing report cards with a null Create Date will no longer issue an error.

- Master Schedule Builder > Teacher/Rooms > can now search for courses without receiving an error.

- Period Attendance screen correctly reflects all currently enrolled students, regardless of term changes.

- SIF Processers screen will no longer reflect an iPass7.0 SIFA agent.
