

I rolled my Course Catalog over before the application enhancement released on April 21 (7.0.20160421_sync) that now rolls over all course information, how do I get the blank/missing course detail and course section data rolled over to next year?

Massachusetts Sync version: Enhancement April 2016
(7.0.20160421_sync)

The End of Year Procedure > Rollover Courses can be run again with Override if Exists = NO. This will ADD the blank/missing data and current data will NOT be replaced.

Click here for [Release Notes for this enhancement.](#)
